PYTHON │ JAVASCRIPT │ PHP │ JQUERY │ HTML │ SQL │ CSS │ EXCEL │ BOOTSTRAP

CERTIFICATES

- "Python Fundamentals for Beginners course"
- "Career Essentials in Data Analysis by Microsoft and LinkedIn"
- "Introduction to Career Skills in Data Analytics"

PROJECTS

Chef Connect   May 2024 – Sep 2024

A MERN stack project called "Chef Connect" was created to make it easier to hire chefs for in-home cooking services. Users can register on the platform to create customized accounts for chefs and clients. Clients can select the ideal chef for their requirements by perusing the comprehensive chef profiles, which highlight their abilities and areas of expertise. The booking system makes it easy for customers to arrange services, and real-time communication tools allow customers and chefs to communicate directly, improving the whole service experience. "Chef Connect" seeks to make hiring professional chefs easier, accessible, and user-friendly for all parties.

Fitness Factory   Apr 2022 – Jun 2022

A web-based gym administration system called "Fitness Factory" was created to simplify a number of gym procedures. The system, which was created with HTML, CSS, JavaScript, PHP, and MySQL, makes it easier to schedule, manage, and keep track of workouts and memberships. Important characteristics include dynamic functionality that improves user experience, extensive data storage to handle member information, and user identification for safe access. By combining these components, "Fitness Factory" hopes to increase member engagement, streamline the administration of gym operations, and increase operational efficiency-all of which will free up staff members to concentrate more on giving members excellent service.

Logistics-Endeavor   Jan 2022 – Mar 2022

The web-based cargo management system is designed to enhance the efficiency of goods transfer and tracking. It utilizes a combination of HTML, CSS, JavaScript, PHP, and MySQL, enabling seamless management of shipments, routes, and user information. The system facilitates real-time tracking of cargo, allowing users to monitor their shipments at any stage of the delivery process. It also optimizes route planning to reduce delivery times and costs, while maintaining a user-friendly interface for easy navigation. Overall, this project aims to streamline cargo operations, improve communication between stakeholders, and provide accurate data for decision-making.
